

cPMT Announces Automated Data Entry

cPMT has announced the latest in their initiatives to automate data entry:

- cPMT has established a business relationship with Vorro BridgeGate to access and import data; they have been selected based on the existing technology and experience with senior health care providers;
- cPMT has tested the automated data entry with current participants; future clients can participate under established connections or coordinate data transfer with their software vendor using the cPMT user interface guidelines.

For more information about this process and the cPMT user interface guidelines contact Paul Rengstorf, cPMT, Inc., at prengstorf@cpmt.net or (507) 289-1910.
